

PowerPool™
MAAX®
SPAS

Power of water

For centuries the power of water has shaped the world we live in. From oceans to streams, the forces of moving water have changed our landscapes and our lives. That same power is now available for your home. From MAAX® Spas, the luxury spa experts, the PowerPool® uses flowing streams of water to create a home environment ideal for fitness, relaxation and healing. PowerPool® combines the best aspects of swimming pools, hot tubs and home gyms. Whether it is to shape your body, soothe your soul or transform your garden into an oasis of tranquillity, PowerPool® harnesses the power of moving water to enhance your life.

■ *Spacious design allows for multiple users*

Water fitness

It's the physical properties of water that make it an ideal exercise environment for all body types. Properties, such as buoyancy, hydrostatic pressure, resistance and heat dissipation create several advantages over land based exercise regimes. These same properties put exercise and fitness within the grasp of many people who suffer from mobility restrictive ailments, chronic back or joint pain, as well as people that may be moderately or severely overweight.

Always check with your physician before starting any exercise program.

Buoyancy

The deeper a person submerges in water the less weight their body will have to support. The buoyancy of water can reduce the weight of a person by up to 90% depending on the depth of water, which reduces stress on their joints and connective tissues. By neutralising the effects of gravity, water provides the perfect environment to exercise for those who are overweight or suffer from pain.

Hydrostatic pressure

A PowerPool® swim spa is the ideal setting to perform stretching or fitness exercises. In water, when the speed of the exercise is increased, the force required to perform the exercise is also increased. Then, as the muscle tires, it will automatically slow down, decreasing the amount of force needed and helping to prevent the chance of injury.

Flow and jet power

Six strategically placed Turbo Swim jets provide variable levels of intensity to match the users' ability levels and resistance requirements. Deep water jets create a complete resistance pattern that ensures a smooth stream of water throughout the depth of the PowerPool®, making swimming and aqua-jogging a pleasure.

Swimmers receive additional benefit from the lower Turbo Swim jets which propel water in an upward and outward angle that provides "lift" as well as flow. These same jets provide resistance to aqua-joggers' lower legs, making every workout more effective.

Swim training

Swimming has long been known as the ultimate zero-impact exercise and is widely prescribed by physicians for patients who want to get in shape or tone their body. PowerPool® employs an impressive water propulsion system that works in concert with its open floor plan design. The observation seats and well marked swim lanes provide the optimum swim training centre for your entire family.

Aerobic training

A wide variety of aerobic exercises are possible in a PowerPool®. Aqua-jogging is especially effective as the deep water neutralises the effects of gravity whilst increasing resistance for an amazing low impact workout. In addition, fitness experts recommend a warm water fitness regime to maximise weight loss.

Toning and sculpting

Your PowerPool® can be equipped with an aquatic exercise equipment package that features modern resistance band technology. Attach the resistance bands to the connector rings on the PowerPool® to perform a complete toning program. Whether you are looking to tone, strength train or add muscle mass, the PowerPool® will maximise your results through efficient heat dissipation and the comfortable warm water environment.

Technically superior

Frame - the frame of the PowerPool® is built to stand the test of time. Fabricated from industrial grade galvanised steel, the finished frame is then dip-coated and painted to withstand the harshest environments.

Unique to PowerPool®, the top rail of the frame is laminated into the shell structure to form a direct connection to the vessel. This provides the structural strength to engineer the depth of the PowerPool®.

Another exclusive feature to PowerPool® is the vessel rib system. All PowerPool® vessels are equipped with galvanised steel ribs. Once welded to the top rail of the frame and laminated with composite fibreglass, the frame and shell combine to make it the strongest possible design.

Powerful pump

The PowerPool® collection is fitted with the 2.0 HP Balboa Niagara dual speed pump. It supplies the specific performance required for zone seating and focused therapy, ensuring a powerful, deep and relaxing spa experience. The improved pump volume and extra power mean this pump can operate with less revolutions to create the desired water pressure, reducing wear and prolonging its life cycle.

Clean water

The CleanZone II™ system uses the power of UVC light, the same technology utilised in many communities around the world to purify drinking water. CleanZone II™ kills 99.9% of micro-organisms, bacteria, viruses and parasites while oxidizing debris left behind. This system is an integral part of every PowerPool®.

■ CleanZone II™

■ Filter Vortex

M7 technology

An advanced, state of the art spa controller provides the ultimate in ease of use, safety and reliability for every spa user. The Powerworks™ with M7 technology is a revolutionary new hardware/software platform that completely eliminates mechanical sensor switches and remote through-wall temperature sensors. The M7 platform features two identical solid state sensors that are mounted inside the heater manifold. These Smart Sensors accurately and reliably measure water temperature while monitoring critical water conditions without the possibility of failure due to mechanical switch malfunction.

Control panel

Your phones, car, microwave, thermostat all have them. Now your tub does too! Almost all new electronic devices today have touch screen interfaces. Now with the new SmartTouch control panel your tub has one too! Based on Balboa's patented touch panel technology, the new SmartTouch panel is the next breakthrough in ease of operation for hot tubs. Its intuitive screens make controlling your tub a breeze.

BlueMAAX™ green insulation system

Exclusive to MAAAX® Spas, the Thermo-Lock™ insulation system now features the eco-friendly 'BlueMAAX' insulation. Made from recycled natural fibre, it is approved by the U.S. Green Building Council. The insulation contains no chemical irritants, is treated with a borate-based solution to prevent mould/mildew growth, pest infestation, and acts as a fire retardant. BlueMAAX™ replaces urethane foam commonly used in "foam filled" hot tubs. The "foam filling" process in conventional spas can produce as much as 22,5 kg of volatile organic compounds (VOC's) which are harmful to the environment. The new energy system also allows for easy service access, and can be taken out and put back together to factory specifications right in your garden.

WiFi Connectivity

MAAX® Collection hot tubs now put your spa's controls in the palm of your hand. Simply download the free app through iTunes, the App Store or Google Play. Search 'PowerPool Swim Spa Control', sync to your spa's WiFi network, sync it with your home network and enjoy complete control. Preset temperature, set filter cycles to save money or get it ready from the comfort of your home before heading out to enjoy a relaxing spa experience.

The inspiring center of your outdoor life

With a Maax® PowerPool you turn your garden into an exciting activities center. Enjoy an excellent work-out or just relax and celebrate life with your family and friends. Its state-of-the-art technology and perfect finishing make sure your PowerPool® is always there to guarantee you optimum enjoyment!

Bluetooth Technology

State of the art Bluetooth technology puts the music at your fingertips. Enjoy your favourite artists and playlists anytime with this easy to use stereo system. Simply sync any Bluetooth compatible device and, as you slip into the soothing waters, enjoy your favourite artists.

Bluetooth audio system

This system is connected to the 'spa pack', the speakers and the subwoofer. Its operation is integrated into the control panel of the spa, so you can decide which music is streamed wirelessly from your tablet or smartphone to your spa. It all works without ancient and clumsy cable connections, and with an unlimited range of music! From the control panel you can scroll through your music and adjust the volume. The audio system can also be turned on and off using the touchscreen, so no energy is wasted.

RS1 REC. SPORT

If you're looking for a cost effective swim spa, the PowerPool RS1 is the perfect choice. It comes with many of the features of the famous RS2, but has a slightly different jet system, using two pumps and four Turbo Swim jets. This set-up guarantees you enough power for a great work-out and intense relaxation. The RS1 shares its design and measurements with the RS2.

RS2 REC. SPORT

Designed for the aquatic fitness enthusiast, the RS2 is a space effective PowerPool® offering a complete array of aquatic fitness and hydrotherapy benefits. With 70 jets, 6 Turbo Swim jets, balance bar rails and optional PowerResistance exercise kit, a complete full body aquatic workout is always challenging. Walk, jog, or run against the Turbo Swim jets for an aerobic workout or tone and define muscles using the PowerPool's® unique resistance training system.

Whether it is used to rehabilitate injuries, build muscle, lose weight, or simply relax, the RS2 is the complete hydrotherapy and aquatic fitness solution.

RB4 BENCH

Technically, the new RB4 swim spa is identical to the RL4 model. But there is a subtle difference that gives it a character of its own: the RB4 features two benches on the side, giving it a large seating area that can accommodate up to eight people. With the two spa seats, this makes the beautifully finished RB4 model a perfect choice for families that like to relax and play. The benches are positioned in such a way that they do not interfere with swimming.

RL4 LOUNGE

The all new RL4 combines all features that make it an outstanding exercise tool with the comfort of an open water spa. You can get fit and relaxed in one and the same swim spa. With a length of just over 4 meters (427cm) and a width of 228cm it will fit easily in most gardens. Powerful pumps provide you with all the power you need for an intense work-out, while the two spa seats with their abundance of hydrotherapy jets will provide you with a well-deserved massage.

MT6 SPORT

The PowerPool® MT6; combines exercise with relaxation in this swim/spa hybrid. The MT6 provides many of the same swim, exercise and health benefits of the DT6 but without the extra electrical hook up for the hot water side. Simply swim, jog, work out and then slip into the soothing massage seats to relax those tired muscles. This is all done in the comfort and privacy of your own garden.

DT6 SUPER SPORT

Enjoy the best of both worlds with the PowerPool® DT6; a combination swim spa and hot tub. Its two separate operating systems allow you to keep the swim zone at your desired exercise temperature while maintaining your hot tub at a higher temperature for hydrotherapy and stress relief.

Work out to your maximum level in the exercise side of the DT6 to the Turbo Swim jets or use the optional PowerResistance exercise kit for strength and resistance training. Then relax and soothe tired muscles in the comfort of the integrated hot tub. Power, comfort and convenience; PowerPool® DT6, all in the safety of your own garden.
